

Force Ware Bomb Blankets

Article No.: 1050006

Force Ware Bomb Blankets and Safety Circles are designed to protect property and personnel from the blast and fragmentation occurring when an IED explodes.

Working in conjunction with the Safety Circle the blankets are especially useful for suspect items such as backpacks or briefcases. The diameter of the closed Safety Circle is variable from app. 40 to 55 cm. The Protection class is the same as the Bomb Blanket.

Bomb Blankets are an ideal first tool to fend threats in busy public places such as airports and train stations.

FEATURES

- Multiple layer blast filler material
- Heavy duty water-resistand Nylon cover
- Lifting straps for easy handling
- Safety circle to lead the blast upwards into the blanket
- Easily carried holdall bag
