

Protection Boot BCB2

Art.-No.: 1180007

FEATURES

- ✓ Protection against anti-personal landmines through degrading the effect of the explosion.
- ✓ Top quality materials with a high durability even in harsh conditions.
- ✓ Special design for better foot protection for deminers.
- ✓ Ballistics at both, sole and sides.
- ✓ Can be used for daily operations.
- ✓ Comfortable to wear in all climates.

DESCRIPTION

BCB2 is the latest protective boot designed by Force Ware specially for deminers. The boot provides the best ballistic for degrading the possible explosions due to mines. The boot offers the psychological comfort of knowing that operators are equipped with a measure of protection against anti-personal land mines. It offers physical comfort as it is flexible, light weight and does not impede movement while operating in any type of terrain.

PROTECTION

The boot has protection on the sole and the sides as well. The side part protection consists of woven aramid. The sole protection consists of hybrid protection structure with rubberized DuPont™ Kevlar® fiber and woven Phenolic hard Kevlar® plate at the heel. This provides a high a high level of protection to deminers.

Unlike other boots, the BCB2 sole protection does not include any metal plates. Therefore the BCB2 is suitable for demining operations using metal detectors. The sole part offers the protection against minimum 50 g TNT. This level of protection results degrading the explosion effect on the foot.

STRUCTURE and QUALITY

In addition to offer best protection, it also offers flexibility and maneuverability at different terrains. With its light weight, the boot can be used during daily operations as well. The boot is specially designed for hard conditions, its natural rubber at the bottom part and special fabric based on MIL standards on upper parts, top skin soft calf leather differentiate the BCB2 boot in the market.

Protection Boot BCB2

Art.-No.: 1180007

SPECIFICATIONS

Available sizes (EU)	40 – 41 – 42 – 43 – 44 – 45 *
Color	black
Weight (pair)	approx. 2000 g for size 42 **
Protection (sole part)	Rubberized Kevlar® protective sole with protection level v50 350 m/s (according to STANAG 2920). Woven phenolic hard Kevlar® plate at the heel with protection level v50 950 m/s (according to STANAG 2920).
Protection (upper part)	woven Kevlar® (except fabric parts)
Structural material of sole	natural rubber with Phylon
Membrane part	waterproof membrane lining
Fabric part	Polyamide Mil-Spec MIL-DTL-32439 Type I Class III, 1000D water repellent
Webbing	Polyamide Mil-Spec A-A-55301 Type III
Sewing thread	Polyamide Mil-Spec A-A-59826
Lace	Polyamide Mil-Spec MIL-C-5040 Type III
Leather thickness	1,6 mm – 1,8 mm soft calf leather (top skin)
Warranty	12 months against labor faults
Life Time of Ballistics	5 years

* Different sizes may be offered, special request needed.

** The weight differs based on the sizes.
