BLAST PROTECTED COMBAT BOOT BCB2

Protection boot against anti-personnel landmines

The BCB2 protection boot is the latest boot designed by Force Ware. It is especially developed for the use in humanitarian and military mine clearance operations with its metal free design. The BCB2 provides ballistic protection by degrading the effect of explosions due to mines. It offers an effective protection against mines containing up to 50 g (0.11 lbs) of explosives.

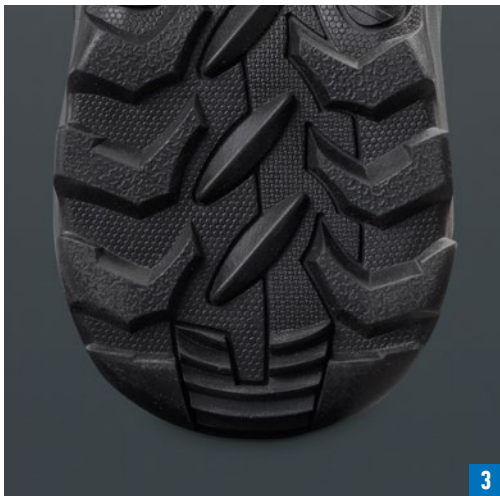

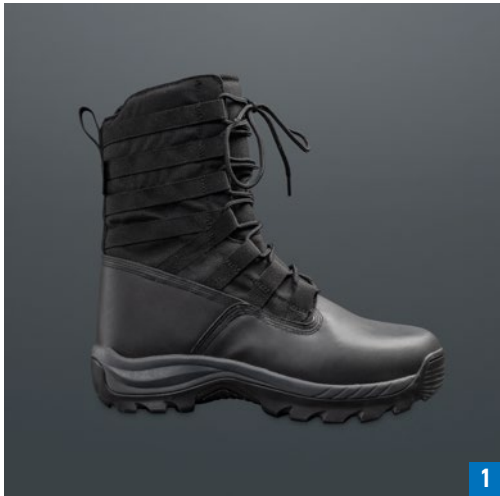

The BCB2 protection boot is water resistant, lightweight, and highly robust even in harsh conditions thanks to its rugged design and durable materials. It allows almost unrestricted mobility independent of the individual working position due to its flexible sole. It is comfortable to wear in all climates and for long daily operations.

- ✓ Protection against anti-personnel landmines according to STANAG 2920
- ✓ Special metal free design for mine clearance operations
- ✓ High durability for harsh conditions
- ✓ Ballistics at sole and sides
- ✓ Comfortable to wear in daily operations for all genders

SECURE FOOTWEAR AGAINST ANTIPERSONNEL LANDMINES:

ensuring safety in demining operations

- 1 Special metal free design for mine clearance operations
- 2 1,6 mm – 1,8 mm (0.06 in x 0.07 in) soft calf leather (top skin) for enhanced durability and comfort
- 3 Woven phenolic hard Kevlar® plate at the heel with v50 protection level of 950 m/s (3117 ft/s), as per STANAG 2920
- 4 Optional carrying bag
- 5 Rubberized Kevlar® protective sole with v50 protection level of 650 m/s (2133 ft/s), as per STANAG 2920
