FRAGMENTATION SHIELD

Fragmentation shield against fragments of exploding mines

The Fragmentation Shield is a protection shield which has been specifically designed for mine clearance and explosive ordnance disposal (EOD) work. It supports EOD technicians in operations where a protection is required from anti-personnel mines or other explosives.

The shield has two telescopic legs that can be placed into the ground. This supports an upright position. Also, it is characterized by a centrally located window. Four soft handles are fitted to the reverse of the shield to assist in carrying it.

- ✓ Protection level 650 m/s (2,133 ft/s) according to STANAG 2920
- ✓ Telescopic legs for comfortable use
- ✓ The shield is available with an optional foot pedal for improved anchorage
