MINE PROTECTION GLOVES MPG

Protective gloves for demining operations

The protective Gloves MPG have been designed specifically for the use with handheld metal detector in demining operations. They are characterized by a high protection level of v50 = 450 m/s (1476 ft/s) according to STANAG 2920 and fulfill IMAS 10.30.

During the design development process, the requirements of major demining organizations and private companies were considered. The gloves consist of high quality and robust Aramid® canvas, as this material is especially designed for protection against fragments of exploding AP mines.

- **Protection level v50 = 450 m/s (1476 ft/s) according to STANAG 2920, fulfills IMAS 10.30**
- **Very lightweight, superior comfort during operations with detection equipment**
- **Hygienic through washable outer cover**
- **Well-ventilated design for operations in tropical areas**
